		Art Unit: 2165					

U.S. Patent and Trademark Office PTOL-303 (Rev. 11-03) Continuation of 5. does NOT place the application in condition for allowance because: 1) Applicant's response of 11/1/04 includes a request for "Entry of Amendment". It is observed that no amendments are being submitted, so this request is moot. 2)Applicant argues that the proposed modifications to the Judge et al. reference would render the Judge et al. reference unfit for its intended purpose. The intended purpose of the Judge et al. system is to allow programs in a medical system to share information. Examiner does not find that adding a login feature or a distributed memory would have any affect on this intended purpose, or prevent the purpose from being achieved. 3) Applicant argues that a shared memory is on a single machine, and not on a network. Examiner already stated this in the final office action. Such an argument does not consider the teaching of the secondary reference to Myers et al., it only considers Judge et al. in isolation, without considering the the teachings of the secondary references. 4) Applicant argues hat Judge et al. lacks the logon feature. Examiner already stated this in the final office action, and held the a modification to include such feature would have been obvious for the reasons cited in the final office action.
